

What European territory do we want?

**Workshop preparing a political debate
on Territorial Scenarios and Visions of
Europe for 2050**

The French experience

The prospective exercise: « Territoires 2040 »

Retrospective of prospective experience of DATAR

Prospective exercise: « Territoires 2040 »

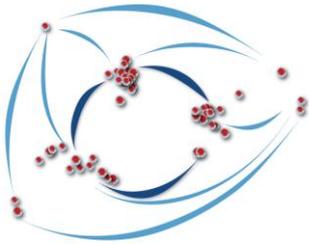

Objective:

« Territoires 2040 » meets the government's will to shed a new light on the process of transformation of French territories confronted with challenges arising which planning policies must meet to build the territories of tomorrow.

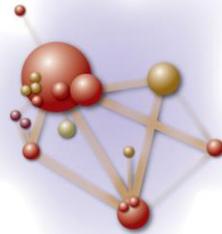

Territoires 2040
aménager le changement

The prospective exercise: «Territoires 2040 »

The 7 spatial systems concerned

The French urban-metropolised system

The integrated metropolised systems

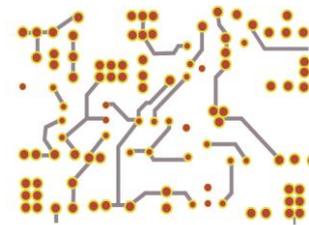

The intermediate cities and surrounding areas

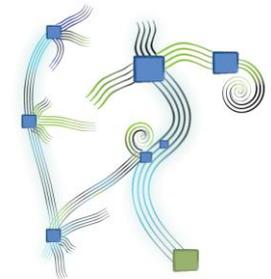

The low density areas

The residential and touristic development areas

The areas of industrial dynamics

The French gateways and the systems of territorial flows

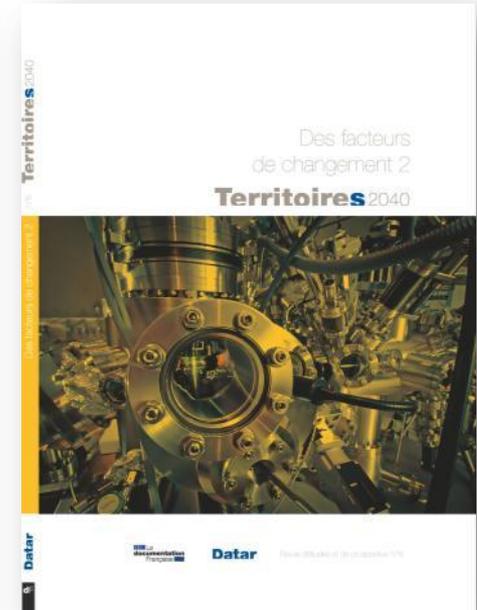

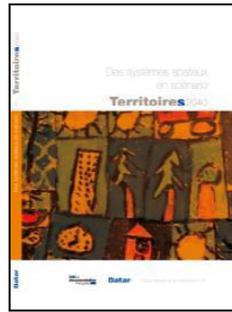

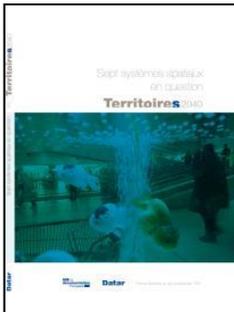

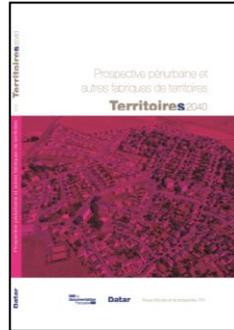

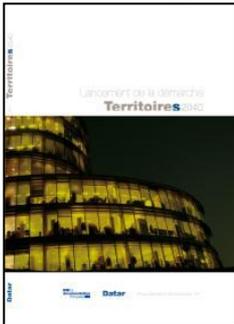

The prospective exercise: «Territoires 2040 »

3 steps in the process :

- 1. Qualification of the spatial systems selected and issue raising**
- 2. Designing the possible scenarios for the evolution of the spatial systems and definition of the key challenges for their future**
- 3. Identification of strategic policies and actions to be implemented to address these challenges**

The prospective exercise: «Territoires 2040»
